

Mussel Rope

Engineered for performance. Designed for nature.

Mussel rope helps aquatic species move through culverts, especially where baffles can't be used in smaller diameters.

TECHNICAL SPECIFICATIONS

- **Material:** UV-stable polyethylene
- **Color:** Black
- **Length:** Customisable to suit site requirements
- **Installation:** Looped or straight configurations
- **Fixings:** 316 Stainless Steel D-Ring and Clasp set, with Masonry Anchors or TEK Screws selected according to the structure's material.

KEY ATTRIBUTES

- Enhances climbing ability for fish
- Low-cost and simple to retrofit
- Minimal impact on water flow
- Flexible and easy to install
- Low maintenance over time
- Effective in low flow rates and high water velocity areas

INSTALLATION OPTIONS

- **Suitable for:** Perched culverts, box culverts, culvert aprons, weirs
- **Compatibility:** Can be used alone or combined with ramps and/or FlexiBaffles
- **Support:** ATS Environmental offers site assessments, installation, and staff training
